

NeuraMatrix AI Kit - User Guide & Installation Manual

What Is NeuraMatrix?

The NeuraMatrix AI Kit is a plug-and-play local AI assistant that runs offline from a USB drive. It launches instantly and provides private, voice-friendly assistance, all without internet.

What's Included

- Pre-configured bootable USB
- AI assistant software (Mistral-based)
- Smart plugins (Notes, Calendar, Summarizer)
- Optional Tailscale remote access
- This manual (PDF)

Setup Instructions

1. Plug the USB into any PC or Thin Client
2. Boot from USB (press F12, ESC, or Delete during startup)
3. System will launch NeuraMatrix automatically
4. Choose your profile and begin using AI features

Key Features

- Ask questions offline using Mistral AI
- Summarize text files
- Manage a local smart notepad
- View synced calendar events from your .ics file
- Optional: connect remotely via Tailscale

Privacy & Data

- No cloud connection required
- All data stays local on your USB
- AI runs completely offline
- Memory is stored in plain-text for transparency

Troubleshooting

- If the device doesn't boot, check BIOS settings
- If AI doesn't respond, open terminal and run: `python3 gui_app.py`
- USB must remain plugged in while running
